E-files

Paper Count function allows users to keep track of all scan actions from both flatbed and ADF, helping to estimate when you may need to apply maintenance and service to your scanner, making more effective use of your scanner.

25 Paper Count

Auto Document Rotation function enables the scanner to rotate every saved files in a readable direction automatically based on a specific OCR language selected.

Remove Punch Hole function automatically detects the location of the punch holes on the scanned documents and fills them in white.

Auto-crop function automatically detects the size of the original image, crops the full scan frame to fit the image, and removes unwanted black borders.

Color dropout function drops out red, green and blue colors from problematic color document to pursue clearer and more accurate form.

Auto-deskew function automatically corrects distorted images for proper alignment.

Remove Blank Page function automatically detects blank pages and removes when scanning a stack of documents. It is quite helpful especially when users are scanning double-sided documents and some of the pages only have text on the front side.
